

# INSTRUCTIONAL TECHNOLOGY CERTIFICATE

---

The instructional technology certificate is a fourteen semester-hour certificate that will provide in-service instructors with the knowledge and hands-on practice needed to succeed in developing and facilitating online courses as well as online or technology based materials for live classes at the K-12 or college level. The five courses in this certificate will introduce students to the theory behind instructional technology and design, the selection and evaluation of web-based tools and applications for instruction, online communication technologies, and the creation and implementation of robust online courses
